

Ubitec and Bollegraaf have entered into a partnership agreement for the installation and maintenance of recycling solutions – targeting Nordic Growth

The Netherlands-based Bollegraaf Group – a global leader in the design and manufacturing of integrated recycling solutions – is known for its continuous development and innovative system-wide solutions. In July, the company signed a partnership agreement with the Finnish company Ubitec Oy. The agreement covers the installation and maintenance of recycling systems, spare parts services, and where applicable, also the resale of the systems themselves. The partnership aims to drive growth in the Nordic region.

Ubitec Oy is a company specialized in industrial automation, electrification projects, and maintenance, with a strong presence in both the Finnish and Swedish markets.

“Through this partnership, we are strengthening Ubitec’s position as Finland’s leading installer of recycling equipment. In addition to installation, we can guarantee our customers reliable maintenance and fast availability of spare parts. Thanks to this agreement, we will also be able to deliver the most functional recycling solutions to the customer in the future. Bollegraaf’s solutions are among the highest quality on the market and are continuously being improved. The agreement was signed at just the right time, as we already see concrete projects ahead in which we can participate as a supplier,” says Ubitec CEO **Leo Nokelainen**.

“The partnership with Ubitec strengthens our position in the Nordic region. Ubitec is a leading player in its field in Finland and already has a strong customer base in Sweden. Through this partnership, we aim to serve our customers in the Nordics with rapid response times and high-quality service. Bollegraaf has the ambition to increase its presence in the Nordics and the cooperation with Ubitec is important to achieve that goal. We believe there is strong demand for our top-level solutions. Our offering covers many waste streams – from household waste, paper, and plastics to construction and demolition waste,” says Bollegraaf CEO **Xander Ferdinandusse**.

“Utilizing artificial intelligence, robotics, and advanced design are key factors on our innovation journey. We are pleased that our values and vision align with those of Ubitec. At the core of both businesses is the commitment to providing sustainable solutions that consider the environment, people’s well-being, and the limited resources of our planet,” concludes Ferdinandusse.

Bollegraaf Group CEO Xander Ferdinandusse (left) and Ubitec Oy CEO Leo Nokelainen believe in the growing need for comprehensive recycling solutions in the Nordic countries.

The worldwide demand for recycling is growing rapidly. With 65 years of experience, Bollegraaf owns unparalleled expertise in the design of sorting processes, manufacture, installation, and commissioning of turnkey sorting solutions.

Ubitec Oy is a Finnish company specializing in electrification, instrumentation, and automation projects for customers in the process and energy industry. We implement electrification, instrumentation and automation projects for customers in the process and energy industry.

We comprehensively plan and implement machine hauling and installations, as well as production equipment modernisations. We also offer our customers expert services, such as electrical and automation design, programming, and commissioning and testing services.

The company was founded in 2012 and is part of the WEST Invest Group, which has a turnover of approximately 100 million euros.
